

KONSILIER AI · PRE-SEED · OCTOBER 2026

Free a billion people from legal helplessness

AI that reads every law, reasons through the case and shows anyone the path through bureaucracy in seconds — freeing millions of hours of human work.

konsilier.com dev@konsilier.com

Most people face the law alone — and give up

5.1B

people lack meaningful access to justice worldwide

World Justice Project, Measuring the Justice Gap (2019)

92%

of civil legal problems of low-income Americans get no or inadequate legal help

Legal Services Corporation, The Justice Gap (2022)

Months

of red tape for a refund, unpaid wages, a fraudulent loan or a wrong fine

Typical everyday disputes we cover

- A lawyer costs more than the claim, so people do nothing.
- Those who try don't know what to write, to whom, or by what deadline. Generic chatbots answer confidently and cite laws that don't exist.

Three clicks from problem to action

Tell it, attach proof, pay and sign — Konsilier AI does the rest on the person's behalf and instruction.

1 · Tell

Voice or text, in the person's own words. Upload contracts, receipts, screenshots.

2 · Understand

AI analyses facts against the law, cites the official text, picks the route: who, where, by when.

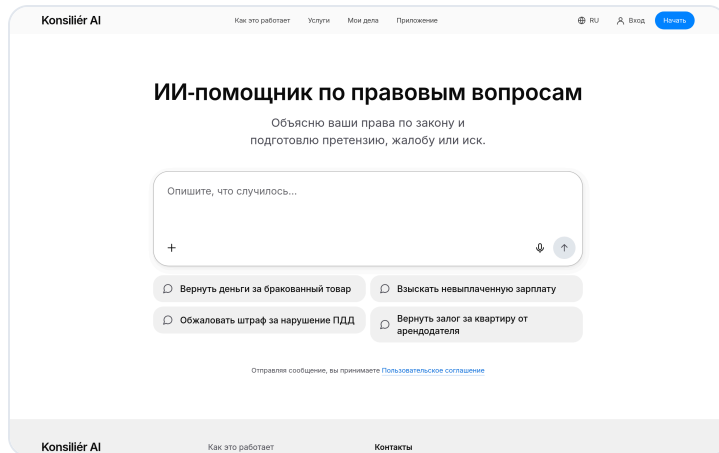

3 · Act

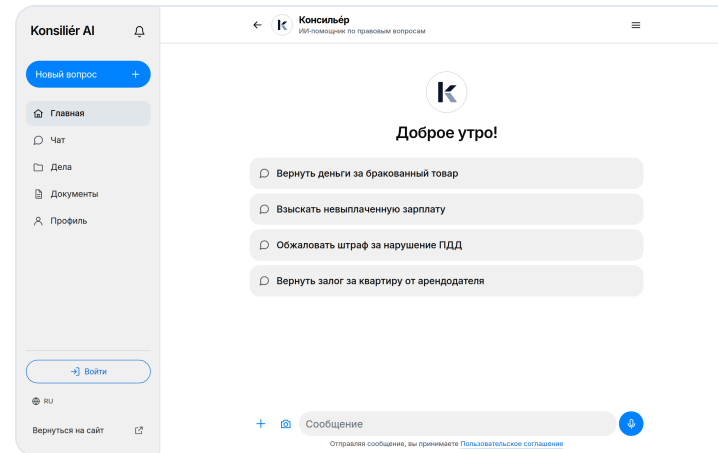

Drafts the claim or complaint, e-signature, sends it to the other party, tracks every deadline.

- Free to understand; paid to act.
- An IT service, not a law firm: it shows the path, it does not promise the outcome.

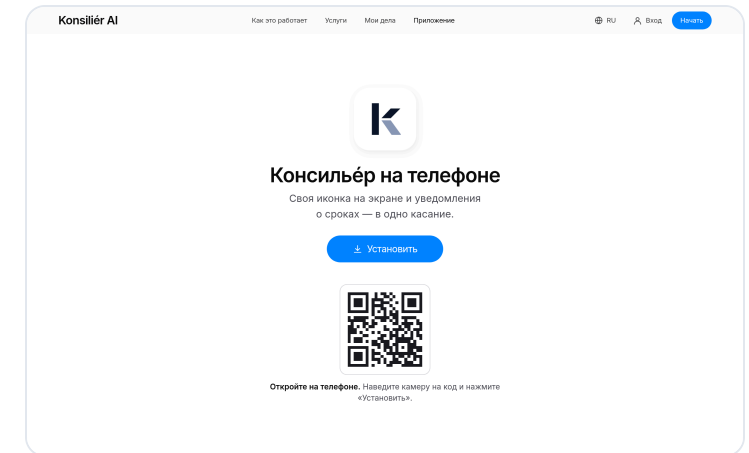

Live product, launched 2 October 2026

Home page

AI chat

Phone app (PWA)

- **21 published scenarios** for Kazakhstan, each carried to a finished document.
- **Sends** the signed claim to the other party by e-mail; deadline reminders.
- **Reads uploads** — PDF, photos, DOCX — and asks only what is missing.
- **Web, phone app, Telegram**; interface in 5 languages.

Three shifts make this possible only now

01

Reasoning AI

Models can now read hundreds of thousands of legal norms and reason over a person's facts in seconds — at a cost of cents.

02

Government went online

E-filing, e-government portals and e-signatures mean a document can be filed without a queue or a visit.

03

Trust shift

People already ask AI first. The gap is an assistant that is grounded in official law and actually acts.

Grounded AI, not a chatbot

Conversational

Voice-first interview that collects facts in plain language.

Analytical

Rule-based scenario engine picks document, addressee and deadlines — not left to the model.

Deep reasoning

Every statute cited only after the official text is retrieved.

Private

Personal data is de-identified before text reaches a model.

- **ZANN** — our own legal language model in development: retrieval over open legal corpora plus fine-tuning of open models, measured on our benchmark Zann-Bench. It replaces third-party models only where it scores better.
- Country packs (law, scenarios, language) make each new market a data project, not a rebuild.

Free to understand, paid to act

FREE

AI chat

Explains the situation and the route, with a daily limit.

PER DOCUMENT

≈ \$4

KZT 1,990 in Kazakhstan. Created after payment.

FULL CASE

≈ \$20

KZT 9,990 — every document one case needs.

- Kazakhstan prices; EU/US pricing to be set per market.
- Growth: referral bonuses and organic social; marketing budget \$0.

Prove it in Kazakhstan, scale to the West

Now	Kazakhstan — test market: 20.5M people, 93% online (stat.gov.kz; DataReportal 2026). Launched 02.10.2026.
------------	--

Next	European Union and United States — main markets.
-------------	---

Then	Australia, Canada, Japan, Southeast Asia.
-------------	--

- Same engine everywhere; a country pack adds local law, scenarios and language.
- Market sizing per country — in the data room, with sources.

Day one — and moving fast

Sept 2026	Product built: web app, phone app, Telegram bot, 21 scenarios.
29.09.2026	Konsilier AI LLP incorporated in Almaty.
30.09.2026	Applied to NVIDIA Inception.
02.10.2026	Public launch in Kazakhstan.

Pre-revenue. First user and payment numbers will be added as soon as they exist — we do not show forecasts as facts.

Built for people, grounded in law

	FOR WHOM	GROUNDED IN OFFICIAL LAW	ACTS (DRAFTS, SENDS, TRACKS)
Generic chatbots	Everyone	No — can invent laws	No
LegalZoom-type services	Consumers, SMB	Templates	Partly, with paid lawyers
Harvey-type tools	Law firms	Yes	For lawyers only
DoNotPay	Consumers	Weak — FTC order, 2024	Partly
Konsilier AI	People and small business	Yes — cites retrieved text	Yes, end to end
