

OUR MISSION

Free a billion people from legal helplessness

The law should work for everyone — not only for those who can afford a lawyer.

PROBLEM

Millions of people face the law alone

Expensive

A lawyer in Almaty charges KZT 4,200–25,000 for a claim letter and KZT 100–250k for court. For a KZT 30k dispute it does not pay off.

Confusing

Laws are written in complex language. People know neither their rights, nor where to go, nor the deadline.

Slow

Finding a lawyer, meetings, waiting — days and weeks, while the legal deadlines keep running.

small businesses — counterparties that do not pay

stat.gov.kz

Three clicks from problem to action

1

Describe it

In plain words, by text or voice.
Konsi asks follow-up questions like a person.

2

Understand your rights — free

A short answer and steps 1-2-3 grounded in the official text of the law.

3

Get the document

Claim, complaint, application or lawsuit — ready PDF and Word with your data and calculation.

4

Sign and send

E-signature, delivery to the other party, "where and to whom", deadline tracking.

Need court? — "Find a lawyer"

The case is already assembled: lawyers respond, the client chooses.
Free for the client.

Where it runs

Web app, phone app (PWA), Telegram. Russian and Kazakh.

Free to understand. Paid to act.

KEY DIFFERENCE

Grounded in law — not a chatbot

Norms only from the law

Articles and deadlines come from the official text (adilet.zan.kz). No article — it is flagged; the AI does not invent.

Rules in code

Documents are drafted by Anthropic Claude, called via API from our server in Kazakhstan (Amazon Bedrock also supported).
Mandatory rules are checked against Kazakh law, encoded and covered by tests.
A scenario engine — not the model — picks the route.

Every document is checked

Correct parties, amounts in tenge, no empty fields. Personal data is de-identified before it reaches a model.

Free chat

40 messages a day, text and voice.

20+ Kazakhstan scenarios

Consumer, debt, employment, housing, utilities, government, family.

Deadline tracking

The app remembers dates and reminds until the case is done.

Two-sided platform: client and lawyer

Client

Question → free analysis → "Document" KZT 2,990 or "Document package" KZT 9,990 → optional "Find a lawyer" (free) → responses → choose a lawyer. The client pays the lawyer's fee directly.

Lawyer

Tokens: 1 token = KZT 1,000, packs from 10. Response to a case — 1 token; a case won — 10/20/30/40 tokens by claim value. Paid before contact, not a fee share — bypassing the platform does not reduce our revenue.

KZT 17,400

revenue per lawyer case — 5.8× a document

13,400 per case + 4 responses

2–7%

of the lawyer's fee — what a case costs them

Prove it in Kazakhstan — scale to the world

Now	Kazakhstan — test market: 19.2M internet users (92.9%, DataReportal). Launched 02.10.2026.	Organic, zero ad budget: WhatsApp, Telegram groups, Facebook groups, referrals ($K \geq 0.3$), accountant partners, SEO scenario pages. First 50 lawyers via an account manager.
Next	Europe and the US — main markets.	Same engine; a country pack adds law, scenarios and language.
Then	Australia, Canada, Japan, Southeast Asia.	A new country is data and local lawyers, not a rebuild.

Konsilier LM — our own legal model

Open base LLM

2–4 candidates compared on our closed tests; licence and Russian/Kazakh quality.

Adapted weights

SFT and LoRA on verified examples — legal method and answer format.

Legal corpus & RAG

Norms with versions and dates; retrieval filters by country and date; answers cite sources.

Konsilier Bench

Closed gold set, questions verified by a lawyer; release only when thresholds pass.

1–2 weeks

Audit and pilot scope: one country, one scenario

2–4 weeks

Base model chosen on Konsilier Bench

4–10 weeks

Corpus and benchmark (in parallel)

3–6 months

Limited pilot of Konsilier LM 1 with lawyers

Source: "Step-by-step plan for our own legal language model", 03.10.2026. Timelines are planning estimates.

COMPETITION

Konsilier vs the alternatives

CRITERION	KONSILIER	LAWYER	GENERAL AI	TEMPLATES
Price per document	from KZT 2,990	KZT 4,200–25,000	—	cheap
Time	minutes	days	minutes	minutes
Grounded in law	official text	yes	may invent	outdated
Fits your situation	yes	yes	partly	no, a blank
E-signature and sending	yes	via lawyer	no	no
Deadline tracking	yes	manual	no	no
Lawyer if court is needed	responses to an assembled case	—	no	no

TEAM

Two founders, operations run by AI agents

Nurlan Khabibulla

Founder & CTO. Designed and built the product end to end.

Saltanat Tulegenova

CEO, director of the LLP. Lawyer.

AI team

Product manager, developer, integrations, QA, documentation, finance, marketing, brand-risk manager, AI legal agent. Founders approve every spend, publication and outbound message.

Plan in 6 months: 9 people

4 ML engineers

3 account managers

ASK

Raising \$500,000 for 10% · \$5M post-money

Konsilier LM

GPUs and model training, corpus and Konsilier Bench — servers and GPUs ≈ KZT 0.9M a month.

Team and office

9 people: CEO, 4 ML engineers, 3 account managers, accountant. ≈ KZT 10.1M a month; one-off ≈ KZT 7–8.5M.

Go-to-market

50 → 490 active lawyers, then the first EU/US market. Team break-even ≈ 590 lawyer cases a month.

Join us to free a billion people from legal helplessness.
